

Igor Borzenkov

Backend .NET (C#) Developer

Location

City: Irkutsk, Russia

Work Preference: Ready for remote work

Age and Experience

Experience: 22 years and 7 months

Age: 44

Contact Information

LinkedIn: [igorborzenkov](#)

Email: iborzenkov@gmail.com

GitHub: <https://github.com/iborzenkov>

GitLab: <https://gitlab.com/iborzenkov>

Stackoverflow: <https://stackoverflow.com/users/6798238/igor-borzenkov>

Professional Skills

C# • .NET Core • .NET • WPF • OOP • Asynchronous Programming • git • CI/CD • Delphi • docker • SQL

Professional Community Involvement

GitHub: @iborzenkov

Duration: October 2016 – Present (9 years and 3 months)

Contributions: 132 contributions to 3 repositories, primarily in C#

Work Experience

Kaspersky Lab

Position: Backend Developer (Middle) • Developer

Location: Russia, Moscow (Remote)

Duration: January 2022 – Present (4 years and 1 month)

Responsibilities and Achievements

- Developed the UI for Windows desktop antivirus products
- Collaborated with designers and a Figma-based design system/graphics pipeline
- Integrated with a low-level business-logic layer; able to read and understand C++ code
- Developed and maintained unit, integration, and E2E tests
- Participated in the migration to import-substituted tools: Git, MS Teams, MS Office, MS Visual Studio, MSBuild, Copilot

Skills Applied

C# • WPF • MVVM • XAML • Object-Oriented Design • .NET Core • Asynchronous Programming • Figma Design • Test Automation • git • CI/CD • docker • Linux

Roszheldorproject

Positions: Middle developer / Senior developer / Architect / Senior Architect

Location: Russia, Moscow

Duration: January 2015 – January 2022 (7 years)

Responsibilities and Achievements

- Developed and maintained a corporate railway design CAD system
- Implemented several mathematical design modules
- Rendered/visualized graphics in drawings (OpenGL) and in UI controls (WPF)
- Implemented interactive user workflows similar to AutoCAD
- Created and maintained unit and E2E tests
- Built several microservice solutions for CAD user monitoring and integrated them with other company systems

Skills Applied

C# • .NET • git • Jira • WPF • ASP.NET • SQL • docker • Scrum • Delphi • CI/CD • TeamCity • SQL Server • EF Core • microservices • Web

Upwork

Position: Freelancer

Duration: November 2013 – January 2020 (7 years and 2 months)

Responsibilities and Achievements

- Built a .NET (C#) Web API client (Crypto APIs)
- Built a Delphi Web API client (Route4Me)
- Developed a Delphi component similar to the review/track-changes system in "MS Word"
- Other small projects

Skills Applied

C# • .NET • Delphi • Windows API • RESTful API • unit testing • English • API Interfaces • git • svn

Irkutskzheldorproject

Position: Software Developer

Location: Russia, Irkutsk

Duration: 2007 – 2013 (6 years and 3 months)

Responsibilities and Achievements

- Developed and maintained CAD software for railway design organizations
- Implemented computational/mathematical modules
- Visualized models on drawings (Canvas) and in form controls (WinForms)
- Generated reporting/documentation (MS Word, MS Excel)
- Created and maintained unit and E2E tests
- Developed a land cadastre and land-use system for the East Siberian Railway

Skills Applied

Delphi • OOP • git • XML • CI/CD • Windows Forms • Jira • unit testing • CAD • AutoCAD

Education

University: Irkutsk National Research Technical University
Faculty: Faculty of Cybernetics
Degree: Systems Engineer, Diploma with Honors
Specialization: Automated Information Processing and Control Systems
Duration: September 1999 – June 2004

Additional Education

Course: C# Developer. Professional Course
Institution: OTUS
Location: Moscow, Russia
Duration: April 2021 – December 2021

Improved Skills

.NET • C# • .NET Core • git • Scrum • asynchronous programming • OOP • Entity Framework • SQL • RabbitMQ • REST • gRPC • test automation • GitLab • docker

Project Work

"Automated Signal Recognition and Event Notification System"

- Created an extensible microservice-based framework for flexible connection of analyzers and data providers.
- Enabled notifications via various channels (email, Telegram, push, etc.).
- Applications: news alerts, stock/crypto alerts, smart home notifications, etc.

Course: Win32 Application Development in Delphi XE5
Institution: Interface Training Center
Duration: October 2014

Improve Skills

Delphi • OOP • SQL

Course: Introduction to Code Generation
Institution: INTUIT
Location: Moscow, Russia
Duration: November 2012

Improve Skills

XML • XSLT

About Me

I have been a professional software developer for over 20 years, with experience in creating highly complex industrial software. I contributed to the development of a CAD system for railway design automation, used by major Russian companies. My work involved:

- Graphical visualization of 2D and 3D data
- Navigation development following industrial CAD standards
- Optimizing work with large datasets

I work with Visual Studio (C#, .NET Framework, .NET Core) and Delphi.

Key Technologies

WPF • MVVM • docker • microservices • Entity Framework • Dapper • SQL • PostgreSQL • SQL Server • XML • JSON • Protobuf • REST • gRPC • RabbitMQ • CAD • UML • PowerShell • git • Jira • Confluence • Multithreading/Async Programming

Currently, I am a developer at Kaspersky Lab, a leader in cybersecurity. I develop user interfaces for flagship Windows products used by millions in B2C and B2B segments. My work involves:

- Implementing features for premium B2C products
- Interacting with low-level C++ business logic
- Ensuring high performance, responsiveness, and fault tolerance
- Working with legacy code and modernizing it
- Writing unit, integration, and end-to-end tests
- Adapting to sanctions by transitioning to open-source tools

I am passionate about exploring modern software development technologies and have diverse freelance experience.
